Report1 has one parameter that has a default value. You need to ensure that users can run Report1. But they cannot modify the default value of the parameter. What should you do? A. Upload a report model file to the report by using SSRSB. Edit report by using the report BuilderC. Edit the report by using Business Intelligence Development StudioD. Edit security of the report by using SSRS **Answer: D**

NEW QUESTION 3You have a System Centre 2012 R2 Configuration Manager Service Pack1 (SP1) site. You use Configuration Manager to manage client computers and servers. You need to ensure that client computer administrators can manage only client computers, and server administrators can manage only servers. The solution must ensure that objects created by the client computer administrators are not visible to the server administrators. Which three actions should you perform before you add the administrator as Configuration Manager administrators? A. Create a custom security role for the client computers and a custom security role for the serversB. Add client computer administrators and the server administrators to the Domain groupC. Create a unique security scope for the client computer objects and a unique security scope for the server objectsD. Set the security scopes for the client computer objects and the server objectsE. Create a collection for the client computers and a collection for the servers **Answer: A**

NEW QUESTION 4You create a domain user named User1. The domain user is a member of the local groups on each client computer as described in the following:-- User: Local Group-- User1: Users-- User2: Administrators-- User3: Power Users-- User4: WinRMRemoteWMIUsers_-- User5: Remote Management UsersYou plan to configure client Push installation. You need to configure the client push installation account. The solution must use the principle of least privilege. What should you do? A. Configure User3 as the client Push installation accountB. Specify User5 as the manager of the Clients OU, and then configure User5 as the client push installation accountC. Add User1 to the Client Admins group, and then configure User1 as the client push installation accountD. Configure User1 as the client push installation account **Answer: C**

NEW QUESTION 5Drag and Drop QuestionYour network contains a System Centre 2012 R2 Configuration Manager Service Pack1 (SP1) environment. Your company currently does not manage software updates. The company plans to use Configuration Manager to deploy updates to 600 client computers that run Windows 8.1 Pro and 3000 client computers that run Windows 8.1 Enterprise. You need to deploy updates to the client computers by using Configuration Manager. Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:Scan all of the client computers - 3Configure a software update point - 4Synchronize software updates - 2Create a software updates deployment - 5Run the setup for windows server update services (WSUS) - 1 **NEW QUESTION 6**Your company has a main office and a remote office. The main office has 3,000 users. The remote office has 600 users. You deploy System Center 2012 R2 Configuration Manager Service Pack 1 (SP1) at the main office. You need to ensure that users at the remote office can use Configuration Manager to start bare metal installations of operating systems over the network. The solution must minimize the number of services deployed at the remote office. Which two features should you deploy at the remote office? Each correct answer presents part of the solution. A. a state migration pointB. a server locator pointC. a PXE-enabled distribution point D. a management pointE. Windows Deployment Services (WDS) **Answer: CD NEW QUESTION 7**Hotspot QuestionYou have a system Center 2012 R2 Configuration Manager Service Pack1 (SP1) deployment that contains the servers configured as shown in the following:

Server1	Primary site server
Server2	Management point
Server3	Distribution point
Server4	Enrollment point
Server5	Software update point
Server6	Out of band service point
